

Homework 2

```
scdb <- read.delim("scdb.csv",header = TRUE,sep = ",")
```

```
unanimous <- filter(scdb,minVotes==0) %>%  
  nrow()
```

Supreme Court Database

The Supreme Court database consists of 8966 cases. It uses 53 variables to describe each case. There have been 3413 unanimous decisions, which constitutes approximately 38% of all their cases.
